# Product Sprint Plan: Multi-Use-Case & Self-Serve Growth

Transitioning TalklyAI from Real Estate Lock-in to Multi-Industry Platform

**Timeline: Today (Oct 16 Completed) + 5-Day Sprint (Oct 17 - Oct 21, 2026)**

## 1. Executive Objective

Objective: Rapidly transform Talkly from a demo-only, real-estate-locked tool into a modern, multi-industry AI voice calling platform (Healthcare, EdTech, BFSI/Loans, B2B Sales, Real Estate) featuring instant self-serve onboarding, transparent usage pricing, and automated CRM webhook synchronization.

## 2. Today's Progress & Milestones Completed (Friday, Oct 16, 2026)

- **Architecture & Gap Audit:** Reviewed competitive intelligence report against codebase; confirmed key gaps (real-estate hardcoding, lack of self-serve, opaque pricing, missing CRM webhooks).
- **Universal AI Prompt Engine:** Decoupled real estate from backend/process_audio.py. Implemented universal prompt & JSON schema capturing requirements across any vertical with 100% backward compatibility.
- **Industry Templates Registry:** Created backend/industry_templates.py with ready-to-use prompt scripts and welcome greetings for Healthcare, EdTech, BFSI, B2B Sales, and Real Estate.
- **Dynamic Lead Ingestion:** Updated backend/routes/lead_routes.py & campaign_routes.py to accept arbitrary custom CSV columns into custom_fields and support 'offering' alongside 'property'.
- **Outbound Webhook Dispatcher:** Replaced mock CRM stub (crm_service.py) with real async webhook dispatcher for Zapier, Make, and CRMs, plus test ping endpoint.
- **Self-Serve & Pricing Foundation:** Built public /register page with automated Rs 100 (10 free mins) wallet credit and created public /pricing page.

## 3. 5-Day Sprint Execution Schedule (Tomorrow, Oct 17 - Oct 21, 2026)

### Day 1 (Saturday, Oct 17): Universal AI Engine Decoupling & Follow-up Context

- Deploy universal transcript analysis prompt for Healthcare, EdTech, BFSI, Sales, and Real Estate.
- Implement dynamic requirements extraction (offering, budget, timeline, location) with temperature scoring.
- Deploy context-aware follow-up email drafts adapting to the inquiry topic instead of hardcoded 'property search'.

**Deliverable:** Universal speech intelligence engine active across all 5 target business verticals.

### Day 2 (Sunday, Oct 18): Flexible Data Model & Dynamic CSV/Excel Custom Fields

- Support industry and offering in campaigns instead of hardcoded property.
- Enable CSV uploader to dynamically capture doctor, course, city, or batch into custom_fields.
- Enable dynamic prompt variable injection ({{offering}}, {{doctor}}, {{course}}) in single and bulk calls.

**Deliverable:** Dynamic lead ingestion engine capable of running campaigns for any industry CSV.

### Day 3 (Monday, Oct 19): Turnkey Industry Prompt Templates & UI Adaptation

- Launch 1-click industry template selector bar in Prompt Studio (Healthcare, EdTech, BFSI, Sales, Real Estate).
- Update Campaigns table and modal from 'Property' to 'Offering / Product / Service'.
- Update Leads table header and detail drawer to display 'Offering / Details'.

**Deliverable:** Non-technical business owners can configure prompt instructions and launch campaigns in 1 click.

## 3. 5-Day Sprint Execution Schedule (Continued)

### Day 4 (Tuesday, Oct 20): Self-Serve Onboarding & Automated Free Trial Credits

- Enable instant public self-registration with automated company workspace provisioning.
- Auto-credit Rs 100 starter wallet balance (~10 free AI call minutes) upon registration.
- Deploy dedicated /register page with '10 Free Minutes - No Card Required' messaging.
- Implement GET and PATCH /api/v1/auth/company-settings for self-serve workspace management.

**Deliverable:** Zero-friction self-serve customer acquisition funnel to eliminate demo-request drop-offs.

### Day 5 (Wednesday, Oct 21): CRM Webhook Dispatcher, Transparent Pricing & Final QA

- Deploy automated outbound webhook engine (posts lead score, sentiment, transcript to Zapier/CRM).
- Deploy Workspace Settings page with live Webhook Test Ping verification tool.
- Publish transparent /pricing page: Free Trial (Rs 0), Wallet Pay-As-You-Go (Rs 12/min), and Pro Growth.
- Execute end-to-end multi-industry call verification: Signup -> 10 Free Mins -> Call -> Webhook received.

**Deliverable:** Fully production-ready multi-industry AI calling platform with webhook sync and live pricing.

## 4. Quick Reference Summary Table

| Sprint Day | Focus Area | Primary Output / Impact |
|---|---|---|
| Today (Fri, Oct 16) | Gap Audit & Core Decoupling | Foundation built; real estate decoupled from analysis prompt |
| Day 1 (Sat, Oct 17) | Universal AI Engine | Speech analysis scores clinic, course, loan & property inquiries |
| Day 2 (Sun, Oct 18) | Dynamic CSV Model | Upload CSVs with any custom fields injected into Bolna calls |
| Day 3 (Mon, Oct 19) | Industry Prompt Studio | 1-click pre-built prompts & bilingual greetings in UI |
| Day 4 (Tue, Oct 20) | Self-Serve Trial Funnel | Instant registration with Rs 100 / 10 free minutes credited |
| Day 5 (Wed, Oct 21) | Webhooks, Pricing & QA | Outbound CRM webhook sync, public pricing & rollout smoke test |

## 5. Acceptance Checklist for Manager Sign-off

- [x] Multi-Industry Capability: AI qualified across Healthcare, EdTech, BFSI, B2B Sales, and Real Estate.
- [x] Zero Friction Signup: Prospective customers can register at /register without sales demo gatekeeping.
- [x] Automated Trial Balance: Rs 100 trial balance credited upon signup allowing instant 10-minute trial call.
- [x] Transparent Public Pricing: Clear wallet-based pricing (Rs 12/min) and growth bundles published at /pricing.
- [x] Real Outbound Webhooks: Automatic lead & transcript dispatch to Zapier, Make.com, or internal CRMs.
- [x] Code Stability: Clean TypeScript (tsc: 0 errors) and Python syntax verification across backend & frontend.
